

CBM Health, Safety & Environment Group Meeting
Tuesday 16 October 2018
National Metalforming Centre, West Bromwich B70 6PY

Agenda

- 09.30 Registration
- 09.45 Welcome
- 9.50 HSE case study
- 10.10 Being person-centred – coaching skills for OSH practitioners – Part 1
Safety practitioners know about the law and the standards that need to be achieved and how others have solved problems. This is the greater knowledge and understanding they bring to a conversation. But there is a growing realisation that technical capabilities alone are not enough. Increasingly organisations are looking for safety people with a more sophisticated skill-set than some of the more traditional stereotypes. They want practitioners who can collaborate with managers and support them in exercising their responsibilities. Coaching is all about being collaborative, supportive and helpful.
- Who are you exercise
 - What is coaching?
 - What are the attributes of a good coach?
 - Asking the right questions at the right time
