

## **Technology Transfer Group Webinar**

### **Hot Forging – Presented by Hatebur AG**

**September 30<sup>th</sup> at 2pm**

After the summer break the CBM will be commencing the Technology Transfer Group webinars with a very interesting technical presentation from Hatebur on Hot Forging.

Hatebur AG in Switzerland manufactures horizontal presses for cold and hotforming in a wire/bar diameter range from 1 mm to 90 mm.

Klaus Schreiner will present an overview of the Hatebur presses - showing horizontal cold forming and hot forming technology, the machine portfolio and the parts which can be produced on these machines.

The agenda will include

- Hatebur company presentation
- Overview of Hatebur technologies
- The horizontal forging process, animation
- Hotmatic HM 35 movie and presentation
- Hotmatic AMP 50-9 movie and presentation
- Hotmatic AMP 70 movie and presentation
- The horizontal coldforming process, animation
- Coldmatic movie and presentation
- Coldmatic CM 725 ServoDrive - 3D animation
