

Webinar: Total Cost Ownership Concept in MWFs – How to calculate the total cost of cutting fluids?

Thursday 19th October at 10am

Metalworking fluids have a substantial financial impact on a manufacturer than the individual purchase price, yet, purchase decisions seem to be made often on a unit price which leads to poor and limited evaluations. In reality, there are many factors to be considered, from purchasing to the waste treatment and disposal, cutting tools lifespan to the productivity to understand the total financial impact of fluids. In this webinar, we are going to examine all these factors and demonstrate a Total Cost of Ownership (TCO) simulation results in significant cost savings if chosen the right fluid.

AGENDA

10:00 – Introduction of Total Uk. Ltd.

10:10 – TCO concept in MWFs

10:20 – Key Inputs-Costs

10:30 – TCO Simulation

10:45 – Case Studies

11:00 – Webinar topic Q&A
