

**UK Metals Council 14<sup>th</sup> – 15<sup>th</sup> September NEC Birmingham**

**UK Metals Expo is the only event that brings together the entire metals supply chain**

From primary metal manufacture to supply chain management, processing metals, fabrication, surface coatings and recycling.

Our free to attend annual event aims to:

- foster relationships and maximise opportunities between the manufacturing, construction and infrastructure supply chains;
- advance education, share best practice and accelerate innovation throughout our community;
- place the Metals Industry at the heart of any future circular economy;
- showcase the best in class across the whole supply chain.

UK Metals Expo benefits from full endorsement and collaboration from the UK Metals Council, its member trade associations and numerous other industry bodies. With a new Governing Body chaired by Lord Rupert Redesdale the influence of the event will be year-round with major initiatives, challenges and successes discussed and presented in detail in the show floor theatres.

Theatre themes include Supply Chains, Innovation, Skills, Circular Economy and Resources. These will set the tone for the event which will be heavily driven by sharing an agenda driven each year by the Governing Body.
