

CBM MINI-EXPO IS BACK WITH MAX OPPORTUNITIES FOR FASTENER MANUFACTURERS

The CBM Fastener Sector are relaunching the mini expo in September, where it invites UK fastener and precision component manufacturers to its 'Mini-Expo' of fastener manufacturing equipment, technologies and services.

The one-day event will take place on **Wednesday 4th September** at the **National Metalforming Centre, West Bromwich**, opening to visitors from **10:00**.

This 'Mini-Expo' will feature around twenty leading UK-based suppliers of manufacturing equipment and technologies - cold heading and thread rolling machinery, process monitoring systems, tooling and dies, coating systems, inspection and test equipment, lubricants, as well as wire and rod materials. Alongside will be providers of heat treatment, coating and threadlocking applicators, testing and inspection, and simulation software.

That adds up to a uniquely time efficient opportunity for general, production and quality management from UK fastener and precision component manufacturers to catch up on support for their businesses.

There'll be a seminar programme that includes an update on **Voestalpine Green Steel**.

If you are interested in exhibiting at this event please email rachael.bromley@thebcm.co.uk for further information.
